

Intuitive Software to Power Your Business

Safety Hangar: Modern Safety Software with Old-School Service

**Technology that simplifies safety.
Service that puts people first.**

We're a friendly, experienced health & safety company based in Bury St Edmunds, Suffolk, combining powerful software with hands-on support from our qualified consultants. With years of industry experience, we help businesses stay compliant, organised, and confident, all delivered with the old-school service the industry has been missing.

The Problem. Why Businesses Struggle With Health & Safety.

Fear or errors or omissions

Time-consuming paperwork

**Confusing accreditation
processes**

Lack of expert guidance

What is legal, what is correct?

**Too many disconnected
systems**

**Software companies that
“sell and disappear”**

**Expensive, ineffective,
outdated software**

How Safety Hangar Supports Your Business

We strive to provide top tier level of service.

We believe safety should be simple, supported, and stress-free

We provide health & safety management software at a low cost

We combine technology & real human expertise

We provide you with access to a competent person

We take the headaches of accreditation away

How Our Software Helps Your Business.

Reduce Admin Time

Automate repetitive tasks, streamline reporting, and keep everything in one place so your team spends less time on paperwork and more time on productive work.

Fast RAMS

RAMS creation is fast, simple, and consistent across your business. What normally takes teams hours of copying, pasting, formatting, and chasing information can be completed in a fraction of the time.

Check In & Check Out

Check In & Check Out feature gives businesses complete visibility over who is on site, when they arrived, and when they left, all without paperwork or manual logs.

Safer, More Organised Workplace

With everything structured and accessible, your business builds a stronger safety culture and reduces risk across every level.

Legally-Compliant Signing From Anywhere

Safety Hangar's remote signing feature allows staff, contractors, and clients to sign important safety documents digitally, without needing to be on site or in the office. It removes delays, eliminates paperwork, and ensures every document is properly authorised.

Accreditation Support

We Handle Your Accreditations, Start to Finish

Accreditations can be confusing, time-consuming, and frustrating — especially when you’re trying to run a business at the same time. Safety Hangar removes that burden completely. Our qualified consultants manage the entire process for you, supported by our powerful software.

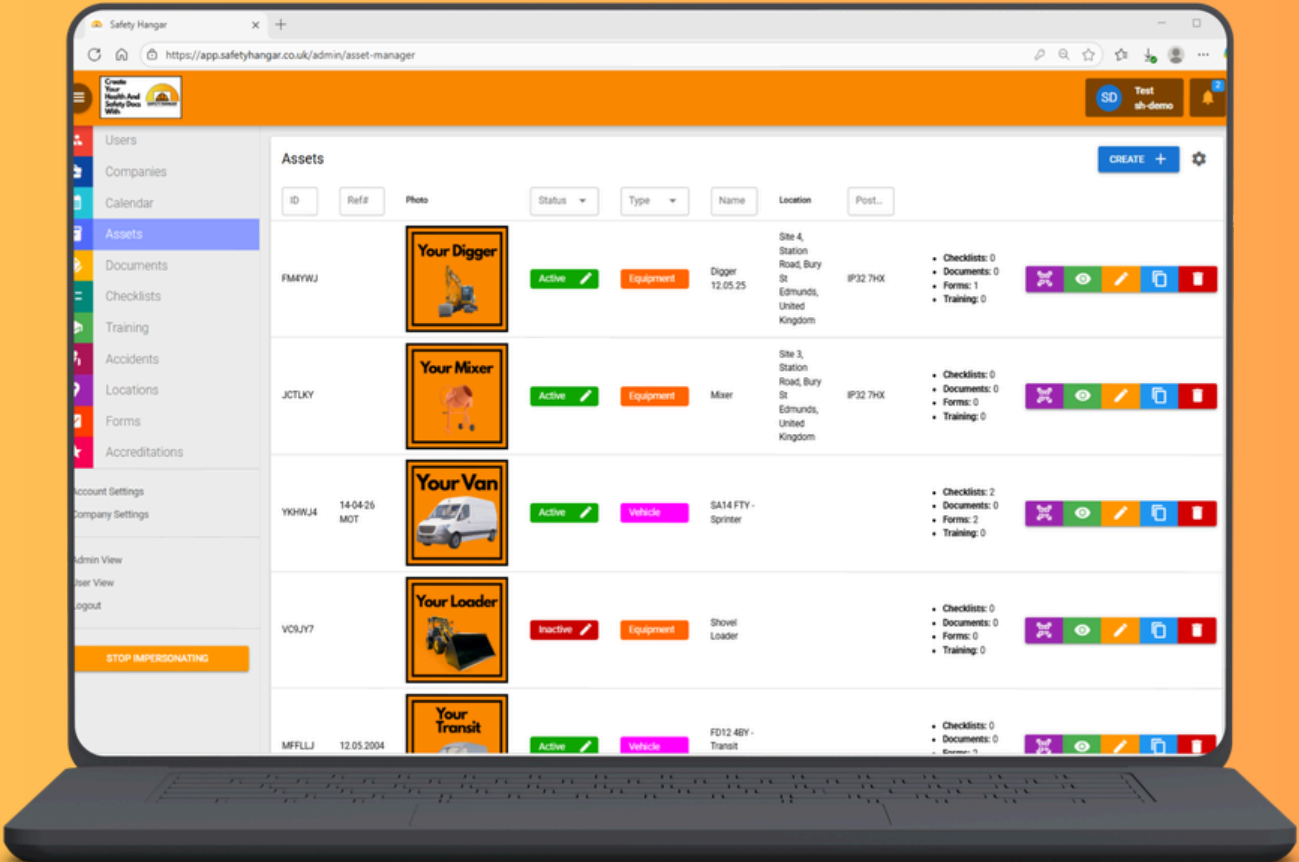

You get the accreditation.

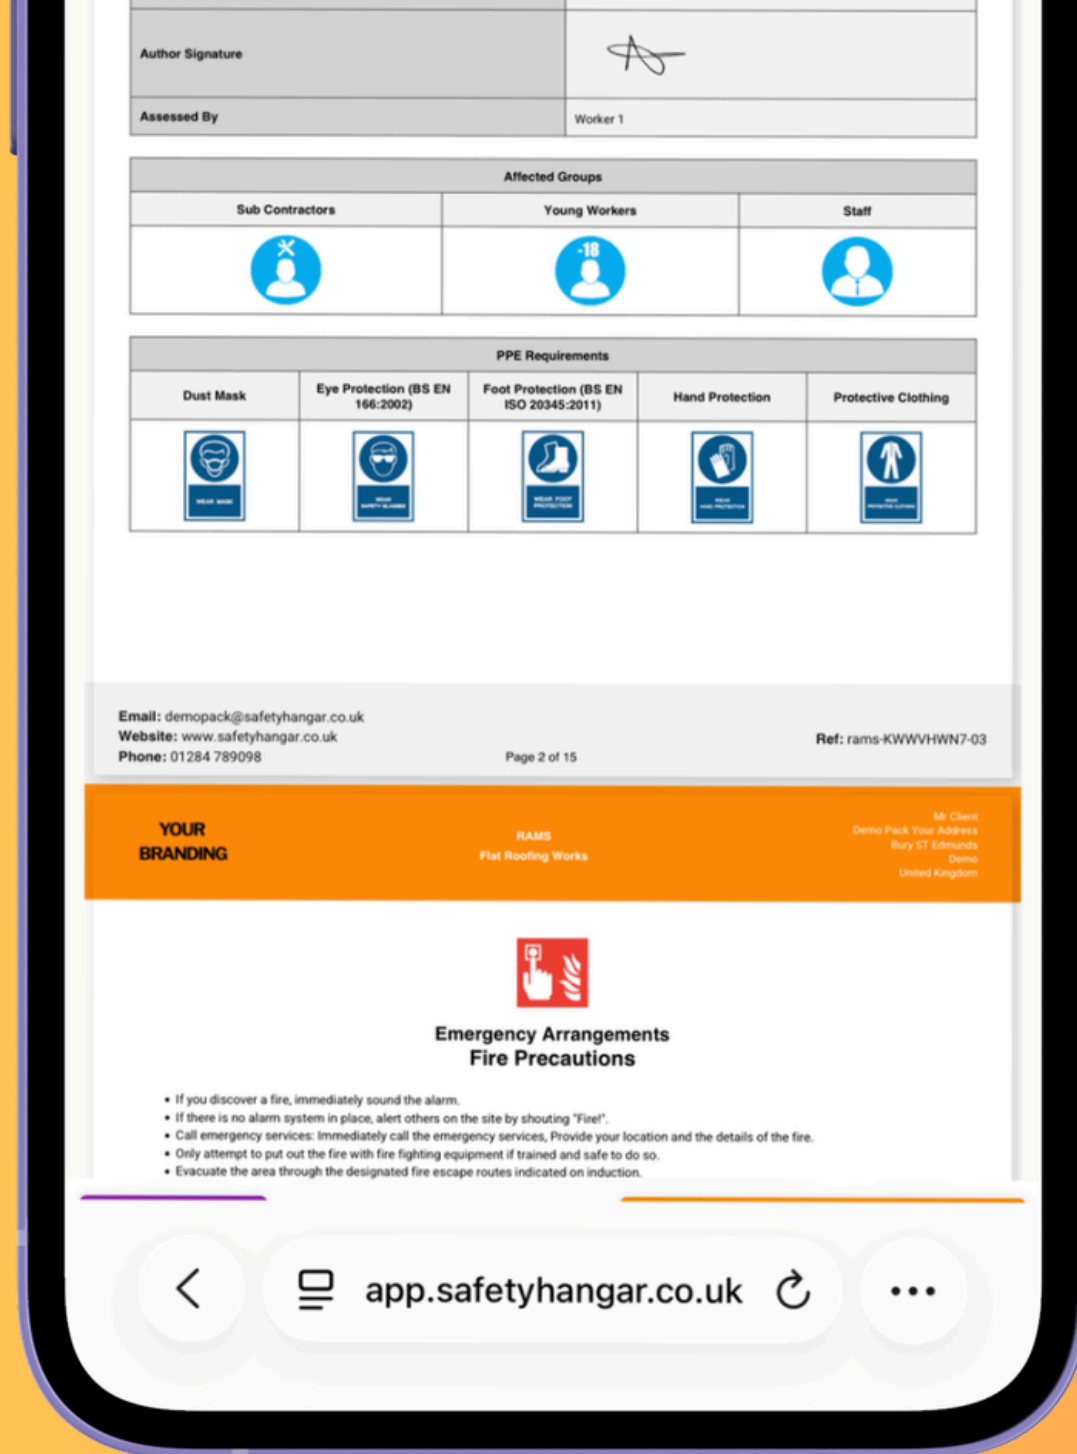

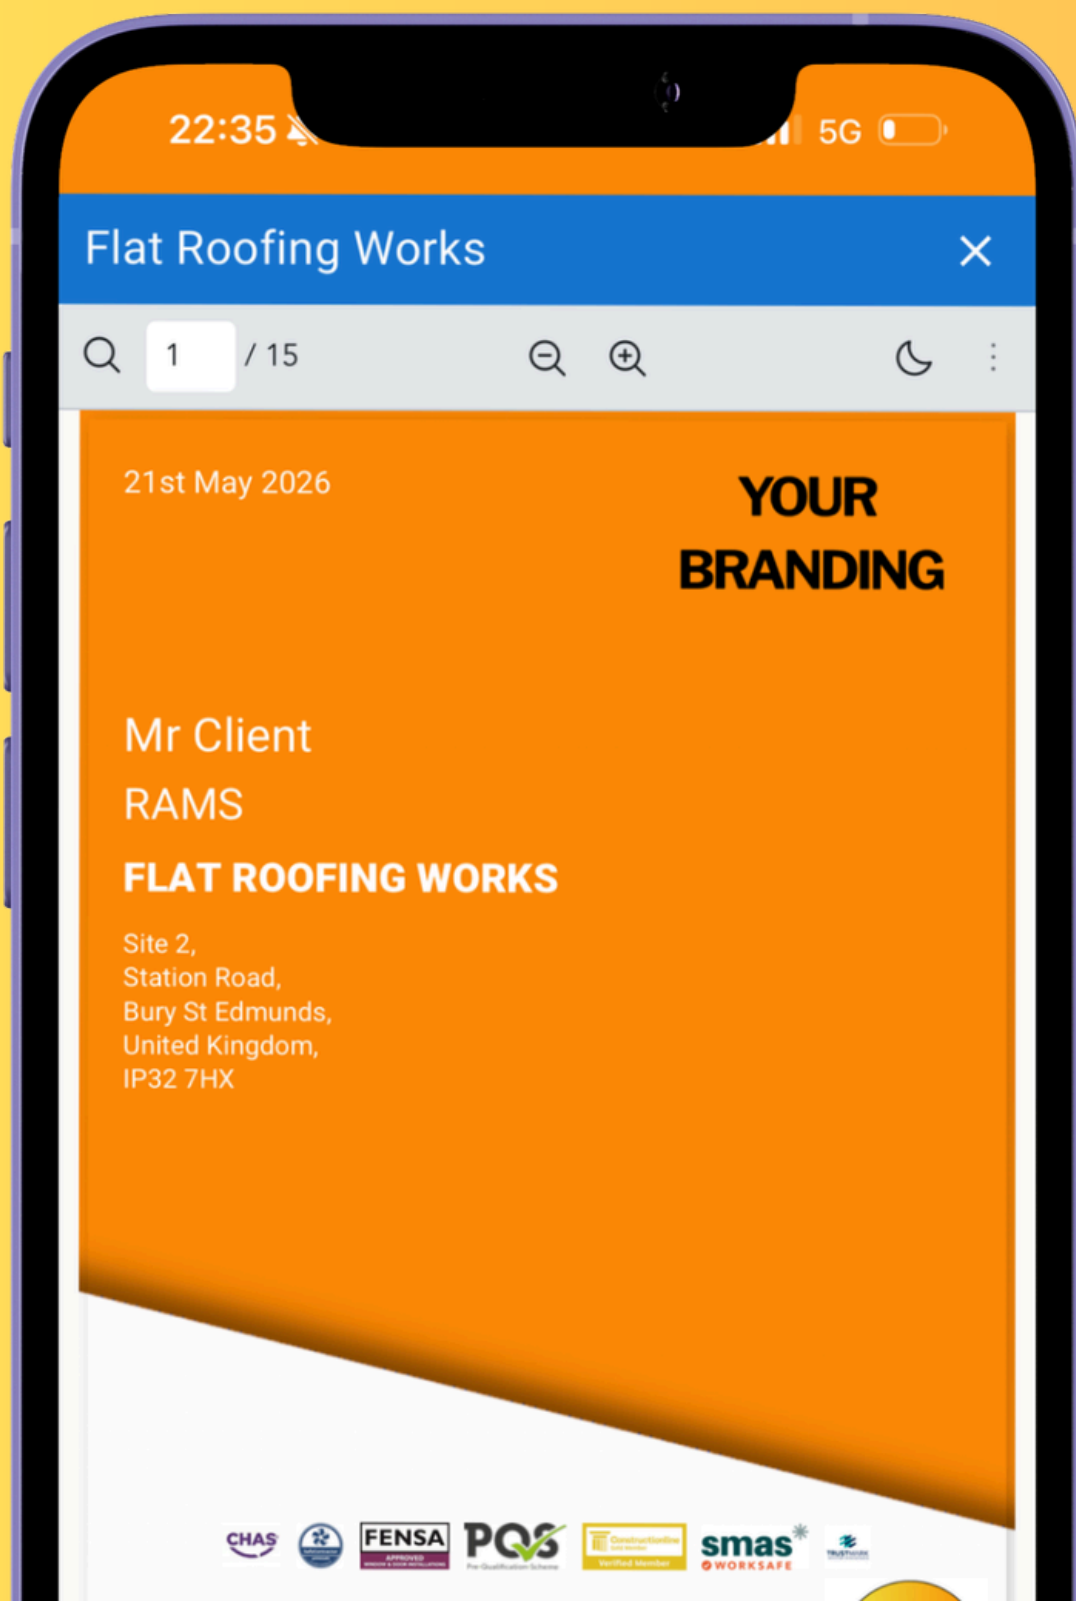

You stay compliant.

We do the heavy lifting.

Branded.
Professional.
Compliant.

Time Keeping & Lone Working

Simple, Reliable Attendance & Safety Tracking for Every Site

Safety Hangar's Check In & Check Out feature gives businesses complete visibility over who is on site, when they arrived, and when they left — all without paperwork or manual logs.

It's designed to be fast, accurate, and easy for any team to use.

✓ Real-Time Site Attendance

See exactly who is currently checked in on any site. This helps supervisors know who is present, who is missing, and who is authorised to be there.

✓ Automatic Time Records

Every check-in and check-out is logged automatically, creating a clear digital record of working hours, site access, and attendance history.

✓ Improved Safety & Accountability for lone working

In an emergency, you instantly know who is on site. No more guessing, no more outdated paper sign-in sheets, alongside your lone working policies & procedures, you are able to see who is on site at any time.

✓ Works on Any Device

Staff can check in using their phone, tablet, or computer, making it easy for teams across multiple locations.

The map displays the Heath Farm Business Centre and its surroundings. A green check-in marker is located at the entrance of the business centre, and a red check-out marker is located nearby. A blue location pin is placed at a nearby building labeled 'Subhouse'. A road labeled 'B1106' and 'Tut Hill' is visible. Other landmarks include a parking area 'P', a 'Training Centre', and a 'Practice Green'. A key at the bottom identifies the markers: green dot for Checkin, red dot for Checkout, and blue dot for Location.

Key:  Checkin  Checkout  Location

QR Code System — Smart, Secure & Incredibly Practical

Safety Hangar's QR code system transforms how businesses manage equipment, safety checks, and sensitive information on site.

It's fast, secure, and designed to give your team instant access to exactly what they need, simply by scanning a tag or poster.

✓ Tag Any Equipment Instantly

Attach a QR code to tools, machinery, vehicles, or assets. When scanned, your staff can immediately see:

- Service history
- Inspection records
- Manuals
- Certificates
- Safety instructions
- No searching, no paperwork — everything is right there.

✓ Hide Sensitive Information Behind QR Codes

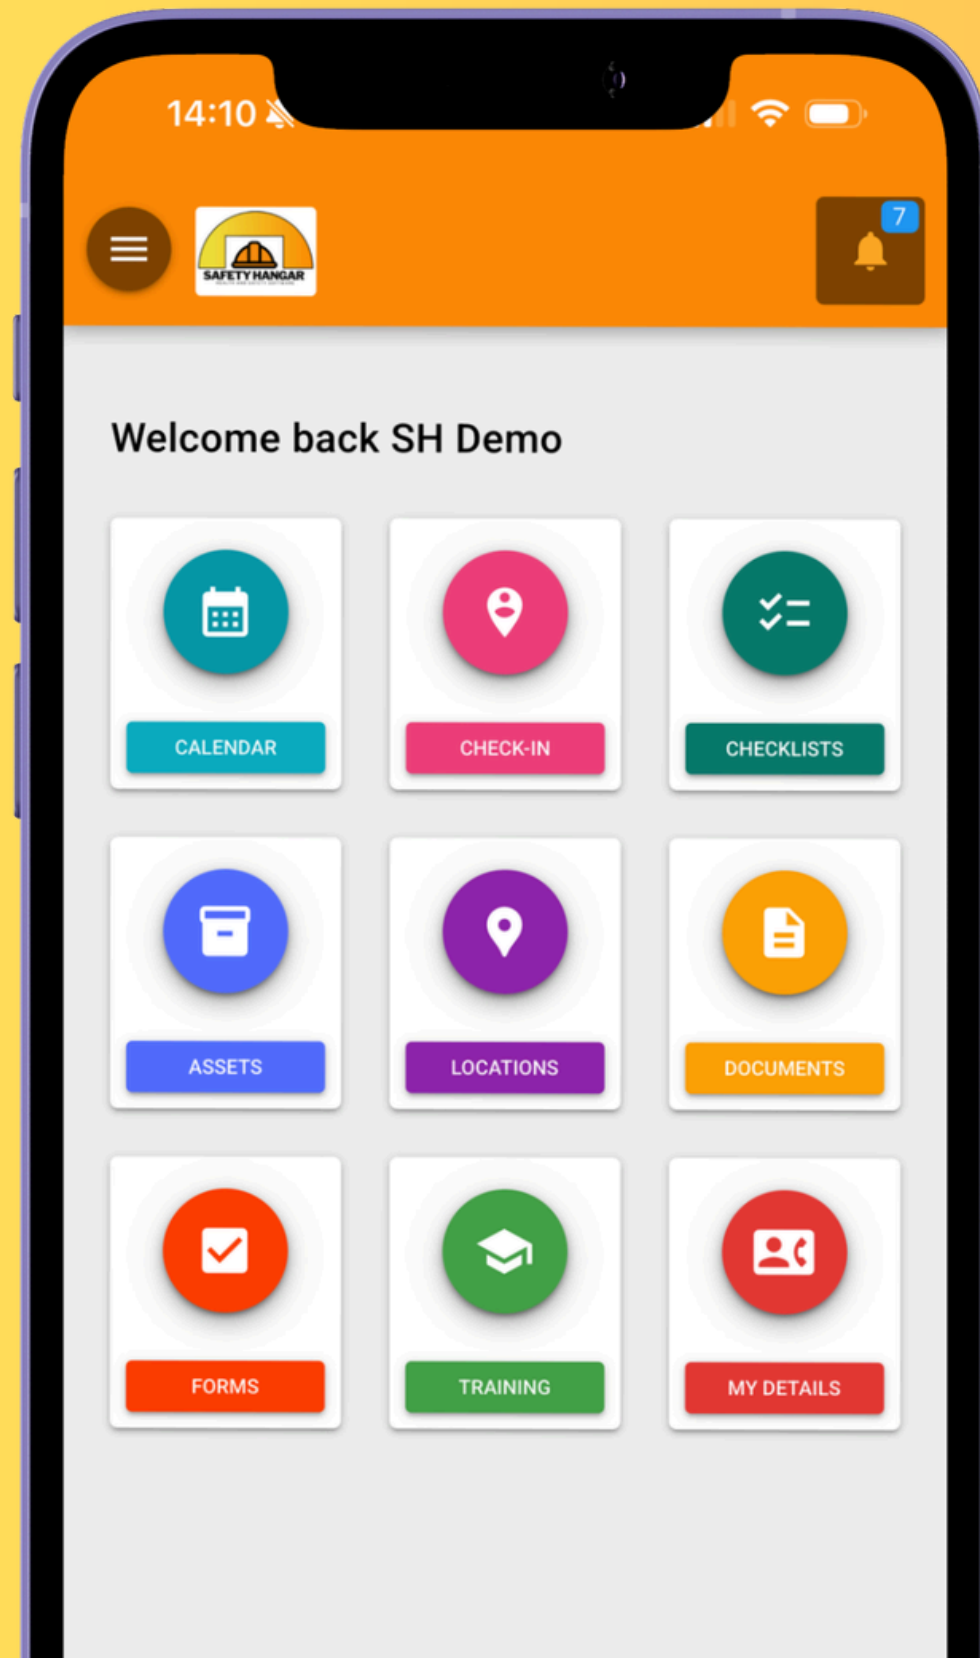

You can store important documents behind a QR code so only authorised staff can access them. This includes:

- Site plans
- Emergency procedures
- Lock-off instructions
- Toolbox talks
- Method statements
- Everything stays secure — nothing is left lying around or shared publicly.

The Result:

A smarter, safer, more organised site where information is always available, but only to the people who should see it.

All In One Place.

Forms

The Forms section gives your business a structured, professional way to capture important business & safety information. Every form is digital, organised, and instantly accessible, ensuring nothing gets lost and every process is recorded properly.

Companies

The Companies section is where you manage all the companies that are connected to yours. It gives you full control over who is registered, PQQ's, who is active, and how each company interacts with your safety system.

Locations

The Locations section lets you manage safety across different sites, branches, or workplaces, think of it like a job folder. It ensures every location is compliant, organised, and monitored individually. Connect your users to allow check ins.

Checklists

The Checklists section ensures tasks are completed correctly, consistently, and on time. It gives your team a clear step-by-step process to follow, reducing mistakes and strengthening accountability. This section includes a full dashboard for reporting.

We Help Integrate.

We request your onboarding information, we get to know your business.

We set up your pack, including logos, to personalise the users experience and brand outbound emails.

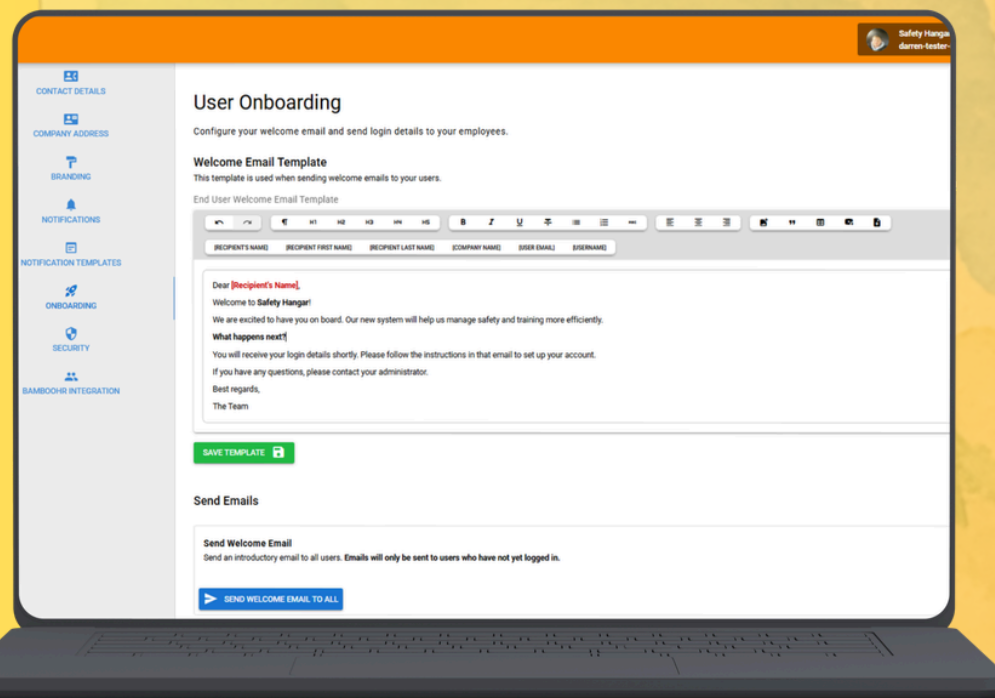

We organise the Admins and Users of your pack.

We prepare any documents you need for the launch.

We walk you through the software, and show you the ropes.

To help integrate in your team, we can send a company wide onboarding email, with logins and passwords, making it seamless for all staff.

Why You Can Trust Safety Hangar.

Trust is earned through clarity, consistency, and genuine care, and that's exactly how we operate. Safety Hangar is built on transparent processes, reliable delivery, and a commitment to keeping people safe.

We don't hide behind jargon or complicated systems; we make safety simple, accessible, and accountable.

Every customer gets the same promise:

Clear communication at every step

Service you can rely on

Safety Professionals when you need it

Continuous improvement driven by real feedback

And the best part?

Our customers publicly rate and review us on Trustpilot, giving you independent proof of the service we deliver every day.
